

## Data Quality Toolkit:

A Facilitated Workshop Series Focused on Improving Data Governance and Use

**Audience:** General and Special Education Administrators, Education Data Managers and Technicians, County Office of Education Team Members, LEA Improvement Team Members, and anyone else seeking to improve data use and governance

Join the System Improvement Leads for a professional learning series where teams will engage and complete each of the components of the Data Quality Toolkit. The toolkit supports LEAs with Data Use and Governance by centralizing resources to help improve data quality.

During each workshop session, teams will have the opportunity to interact with the Data Quality Toolkit by completing the self-assessment and the data landscapes, setting data quality priorities, and selecting targeted improvement activities to develop a Data Quality Action Plan.

**Teams are highly encouraged to attend the workshop series together.**

## Dates & Locations

**8/30/21** | 9:00-10:30 a.m.  
DQT LEA Self-Assessment

**9/13/21** | 9:00-10:00 a.m.
