

*Collaborating with families to meet student needs*

## **Audience:**

Open to all educators

*Due to popular demand we've added more trainings!*

Join the System Improvement Leads (SIL) and Key2Ed, a national authority on IEP facilitation and conflict resolution, to learn skills and strategies that allow you to prevent and/or work through conflict during the IEP process.

Work collaboratively to develop skills, knowledge and mindset for:

- Guiding IEP groups towards their objectives
- Assist people in building understanding and agreement
- Prevent, reduce, and resolve conflict
- Bring out the best in all group members

When these concepts come together, the team finds shared responsibility and shared understanding.

Each workshop series is 5 days and embeds a blended instruction including self-study modules, group sessions with a combination of synchronous & asynchronous learning. Participants are asked to dedicate a total of 16 hours, including one to two hours each day beginning at 1:30 p.m. (Pacific Time) for live facilitation.
